☎ 630-842-0692 ✉ AnthonyBaptiste00@gmail.com [linkedin.com/in/anthony-baptiste00](https://www.linkedin.com/in/anthony-baptiste00) [Portfolio](#)
Analytics Engineer | dbt · SQL · Python · Snowflake | Data Modeling, Pipeline Design & Warehouse Architecture

Education

Northern Illinois University

B.S. Operations & Information Management | Computer Science Minor

May 2026

DeKalb, IL

Relevant Coursework

- Database Management
- Business Intelligence
- Data Analytics
- Statistics
- ETL / ELT Systems
- Information Systems
- Predictive Analytics
- Enterprise Systems

Experience

Network Planning Analyst Intern

June 2025 – August 2025

Shipt

Birmingham, AL

- Built automated SQL- and Python-based ETL pipelines to process daily order volume data across 30,000+ ZIP codes, delivering clean, analytics-ready datasets that powered a Tableau geospatial reporting system used by 5+ planning teams.
- Designed the data layer for a network analytics platform — structured raw delivery data into modeled outputs with consistent KPI logic, enabling planners to identify high-risk regions and make proactive network decisions with 30% better visibility.
- Collaborated with Market Operations and Network Planning to define data requirements and schema logic, translating operational business questions into reliable pipeline outputs aligned with downstream reporting needs.

IT Data Analyst Intern

March 2025 – May 2025

Innovation DuPage

Glen Ellyn, IL

- Standardized metric definitions and reporting logic across 20+ KPIs for Tableau dashboards, improving data consistency and reducing reporting cycle time by 40%.
- Built SQL and Excel data transformation workflows to clean and structure raw program data for downstream analysis, enabling reliable trend reporting for leadership decision-making.

Consultant

August 2025 – December 2025

Mystery Street Recording Company

Chicago, IL

- Structured fragmented market and engagement data from 15+ studios into organized analytical frameworks, enabling consistent cross-studio performance comparisons and segment-level reporting used in leadership deliverables.

Projects

NBA Analytics Engineering Pipeline - 10 Seasons | *Python, Prefect, BigQuery, dbt, Power BI* | [GitHub](#) **Jan 2026**

- Implemented dbt models across staging, intermediate, and mart layers to transform 10 seasons of raw NBA data into analytics-ready datasets using modular, testable SQL transformations.
- Modeled a scalable warehouse schema with season-aware fact tables and conformed dimensions in BigQuery, enabling efficient multi-season querying and Power BI cross-season analysis.

Technical Skills

Data Modeling & Transformation: dbt (staging/intermediate/mart layers, tests, documentation), SQL (CTEs, window functions, joins), dimensional modeling (star schema), referential integrity

Warehousing & Infrastructure: Snowflake, BigQuery, PostgreSQL, GCP, ETL/ELT pipelines, Git/GitHub

Languages: Python (pandas, numpy, scikit-learn), C++

Visualization: Tableau, Power BI, Matplotlib, Excel

AI & Automation: LLM workflows, prompt engineering, GPT-assisted pipeline development, AI-accelerated data modeling, Cursor

Extracurricular Leadership & Competitions

School Involvement & Competitions

2022 – Present

Northern Illinois University

- **1st Place — NIU Data Visualization Competition (HAVI):** Built Power BI dashboard using Python and Excel to analyze QSR supply chain inefficiencies; presented to an industry panel of supply chain professionals.
- **Founder & Chair — OMIS IGNITE:** Launched a student-led initiative connecting OMIS majors with professional development opportunities; organized workshops, speaker panels, and industry networking events.
