Data Scientist | Python · ML · NLP · LLMs | Forecasting, Experimentation & Applied AI Research

Education

Northern Illinois University

B.S. Operations & Information Management | Computer Science Minor

May 2026

DeKalb, IL

Relevant Coursework

- Machine Learning
- Predictive Analytics
- Data Mining
- Applied Python
- Database Management
- Statistics
- Data Visualization
- Decision Science

Experience

Undergraduate AI/NLP Researcher

June 2025 – Present

Northern Illinois University

DeKalb, IL

- Built a GPT-based simulation pipeline generating AI interview transcripts for 28 founder personas using consistent structured prompts, enabling systematic comparison of AI-generated vs. human responses across tone, depth, and factual accuracy dimensions.
- Developed a Python NLP pipeline applying thematic coding and sentiment scoring to evaluate transcripts at scale, producing structured evaluation frameworks (Catch / Miss / Strengths / Weaknesses) that surfaced alignment gaps between AI and human interview content.
- Designed a rigorous qualitative evaluation methodology with faculty mentors, establishing multi-dimensional scoring criteria that balanced quantitative metrics with interpretive analysis — positioning AI as a structured research collaborator.

Network Planning Analyst Intern

June 2025 – August 2025

Shipt

Birmingham, AL

- Built Tableau geospatial dashboards analyzing daily order volume across 30,000+ ZIP codes, enabling Market Operations to surface delivery blind spots and make proactive network decisions — improving KPI visibility by 30%.
- Automated Python ETL pipelines and Tableau extract refreshes, eliminating 10+ hours of manual reporting per week and enabling real-time decision support for 5+ cross-functional teams.

Consultant

August 2025 – December 2025

Mystery Street Recording Company

Chicago, IL

- Applied Python-based segmentation analysis across 15+ competitor studios to surface 3 high-potential audience segments using SEO and engagement data, delivering data-backed strategic recommendations to leadership.

Projects

Retail Demand Forecasting Pipeline | Python, LightGBM, MLflow, SQL, Tableau | [GitHub](#)

April 2025

- Engineered a synthetic retail dataset simulating enterprise conditions — seasonality, promotions, pricing dynamics, weather effects, demand drift, and missing data — to build a production-realistic forecasting benchmark.
- Built a time-series forecasting pipeline with lag features, rolling-window averages, time-based cross-validation splits, and segment-level diagnostics evaluated across stores, categories, and promotional periods.
- Reduced forecast error from 15.18% to 13.0% wMAPE using LightGBM with feature engineering; tracked all experiments in MLflow and delivered Tableau dashboards enabling stakeholders to explore revenue trends and forecast performance.

Technical & Analytical Skills

ML & Modeling: scikit-learn, LightGBM, TensorFlow, time-series forecasting, feature engineering, cross-validation, model evaluation

Languages: Python (pandas, numpy, scipy, statsmodels, scikit-learn), SQL, C++

Experimentation: A/B testing, z-tests, logistic regression, hypothesis testing, confidence intervals

Experiment Tracking & Infrastructure: MLflow, Snowflake, Azure AI, GCP, Git/GitHub

AI & NLP: LLM workflows, GPT-based simulation pipelines, prompt engineering, thematic coding, sentiment analysis, AI as research collaborator

Extracurricular Leadership & Competitions

School Involvement & Competitions

2022 – Present

Northern Illinois University

- **1st Place** — **NIU Data Visualization Competition (HAVI):** Built LightGBM demand forecasting model and Power BI dashboard using Python and Excel; presented methodology and results to supply chain professionals.
- **Founder & Chair** — **OMIS IGNITE:** Launched a student-led professional development initiative for OMIS majors; organized workshops, speaker panels, and industry networking events.
