Supply Chain & Demand Planning Analyst | Python · SQL · SAP · Tableau | Forecasting, Network Analytics & Inventory Optimization

Education

Northern Illinois University

B.S. Operations & Information Management | Computer Science Minor

May 2026

DeKalb, IL

Relevant Coursework

- SCM Systems
- Demand Planning
- Process Improvement
- Decision Science
- Predictive Analytics
- Operations Management
- Data Analytics
- Database Management

Experience

Network Planning Analyst Intern

June 2025 – August 2025

Shipt

Birmingham, AL

- Owned design and deployment of a Tableau geospatial analytics platform analyzing daily order volume across 30,000+ ZIP codes, enabling Market Operations to identify misconfigured ZIP code coverage, surface delivery blind spots, and make proactive network decisions with 30% greater KPI visibility.
- Built SQL- and Python-based ETL pipelines to automate daily data processing and Tableau extract refreshes, eliminating 10+ hours of manual reporting per week and improving supply chain data reliability for 5+ planning teams.
- Partnered with Market Operations and Network Planning stakeholders to translate ambiguous operational performance questions into structured analytical frameworks, ensuring geospatial insights aligned with real-world supply network constraints.

IT Data Analyst Intern

March 2025 – May 2025

Innovation DuPage

Glen Ellyn, IL

- Built Tableau dashboards tracking 20+ operational KPIs across program areas, standardizing metric definitions and improving reporting efficiency by 40% to support capacity planning and resource allocation decisions.
- Applied Excel-based modeling to identify demand and utilization trends across cohorts, informing leadership decisions on outreach strategy and resource prioritization.

Consultant

August 2025 – December 2025

Mystery Street Recording Company

Chicago, IL

- Translated fragmented market and demand data from 15+ competitor studios into structured segments and KPI frameworks, delivering decision-ready findings that directly informed growth strategy and investment prioritization for leadership.

Projects

QSR Demand Forecasting & Inventory Planning Model | Python, LightGBM, SQL, Tableau | GitHub April 2025

- Developed a LightGBM demand forecasting model predicting daily restaurant-level sales by menu item, improving wMAPE from 15.18% to 13.0% — directly reducing stockout and overstock risk in QSR inventory planning.
- Quantified and modeled key demand drivers: promotions (+15% demand lift), events (+30% lift), and seasonality — providing planning teams with explainable signals to adjust procurement, replenishment, and allocation strategies.
- Presented model methodology, forecast validation approach, and planning recommendations to a panel of supply chain professionals and data scientists, translating statistical outputs into actionable inventory decisions.

Technical & Analytical Skills

Supply Chain & Planning: SAP S/4HANA, Google OR-Tools, demand forecasting (LightGBM, time-series), inventory optimization

Languages & Querying: Python (pandas, numpy, scikit-learn, LightGBM), SQL (CTEs, window functions), C++

Visualization & Reporting: Tableau (geospatial, KPI dashboards), Power BI, Excel (advanced modeling), Matplotlib

Infrastructure: Snowflake, GCP, Git/GitHub, ETL/ELT pipelines

AI & Automation: LLM workflows, GPT-based forecasting assistance, prompt engineering, Cursor

Extracurricular Leadership & Competitions

School Involvement & Competitions

2022 – Present

Northern Illinois University

- **1st Place** — **NIU Data Visualization Competition (HAVI):** Built LightGBM demand forecasting model and Power BI dashboard to analyze QSR supply chain inefficiencies; presented methodology and results to an industry panel of supply chain leaders.
- **Founder & Chair** — **OMIS IGNITE:** Launched a student-led initiative connecting Operations and Information Management majors with professional development; organized workshops, speaker panels, and networking events.
