Product Analyst | Experimentation · SQL · Python · Tableau | A/B Testing, Funnel & Behavioral Analytics

Education

Northern Illinois University

B.S. Operations & Information Management | Computer Science Minor

May 2026

DeKalb, IL

Experience

Digital Experimentation Analyst

June 2026 – Present

Ulta Beauty

Bolingbrook, IL

- Analyze A/B and multivariate tests across web and app experiences using **Adobe Target** and **AB Tasty**, validating traffic allocation, randomization, segmentation, and audience overlap to ensure data accuracy and statistical reliability before drawing inference.
- Build post-test analyses that quantify incremental impact on conversion, engagement, and customer-behavior KPIs, then synthesize results into executive-ready narratives outlining implications, risks, and recommended next steps.
- Support the personalization program by translating experiment results into prioritized recommendations, helping cross-functional partners decide which experiences to ship, iterate, or retire.

Network Planning Analyst Intern

June 2025 – August 2025

Shipt

Birmingham, AL

- Designed and deployed a Tableau analytics platform to analyze daily order volume across 30,000+ ZIP codes, enabling Market Operations to surface geospatial delivery blind spots and make data-driven network decisions — improving KPI visibility by 30%.
- Wrote SQL queries and built automated Python ETL pipelines to process and deliver daily delivery data, eliminating 10+ hours of manual analysis per week and enabling real-time decision support for 5+ planning teams.

Business Analytics Consultant

August 2025 – December 2025

Mystery Street Recording Company (via NIU Experiential Learning Center)

Chicago, IL

- Synthesized SEO, engagement, and competitor signals into high-potential audience segments with channel-specific targeting recommendations for non-technical leadership.
- Owned deliverables end-to-end from data gathering through executive presentation, incorporating client feedback so the final recommendations were practical and implementation-ready for a real business.

Projects

Digital Experimentation: Checkout A/B Test Analysis | *Python, SQL, statsmodels*

April 2025

- Designed and analyzed a 290,000-user A/B test on a checkout flow change across 3 markets: validated 50/50 traffic split, confirmed randomization integrity, and ran data quality checks before drawing inference.
- Applied a two-proportion z-test and three logistic regression specifications (group-only, country controls, country interaction) to assess conversion lift — confirmed a statistically robust null result ($p = 0.19$) across all model specs and geographies.
- Quantified country-level conversion deltas (US: -0.22pp, UK: +0.11pp, CA: -0.69pp), documented data quality issues, and packaged findings into an executive slide deck with a clear **DO NOT SHIP** recommendation backed by rigorous statistical evidence.

Technical & Analytical Skills

Experimentation & Product: A/B testing, multivariate testing, hypothesis testing, z-tests, logistic regression, funnel & conversion analysis

Analysis & Querying: SQL (CTEs, window functions), Python (pandas, numpy, scipy, statsmodels, scikit-learn)

Visualization & Tools: Tableau, Power BI, Adobe Analytics, Customer Journey Analytics (CJA), Adobe Target, AB Tasty, Excel

Infrastructure: dbt, PostgreSQL, Snowflake, GCP, Git/GitHub

AI & Automation: LLM workflows, prompt engineering, GPT-based analysis

Extracurricular Leadership & Competitions

School Involvement & Competitions

2022 – 2026

Northern Illinois University

- **1st Place** — **NIU Data Visualization Competition (HAVI):** Analyzed QSR supply chain data using Python and Excel, built a Power BI dashboard, and presented findings to an industry panel.
- **Founder & Chair** — **OMIS IGNITE:** Launched a student-led professional development initiative for OMIS majors; organized workshops, speaker panels, and industry networking events.
